# Setting the scene:

Collaborative partnerships in research

TU/e

# Our use cases:

14 international partners, PP

90 experimental labs

11 partners, UU

35 private partners, Min EZ, WUR

# Complexity of the collaboration

- The size of projects
- Alienation of the partners
- Different data maturity levels
- Conflicting regulations

Image by Julien Murlon, Flickr (CC-BY-SA-NC)

# How to share the data

- **Who ‘owns’ the data?**
- **Proper data sharing agreements**
- **Secure infrastructure**
- **Clear guidelines from funders**

**“Trust is not enough”**

# Recipes for agreements

- **Institutional agreements should include guidelines for collaborations**
- **Elements in consortia agreements**
  - IP
  - Future use and commercialisation
  - Knowledge transfer processes

# Institutional guidelines

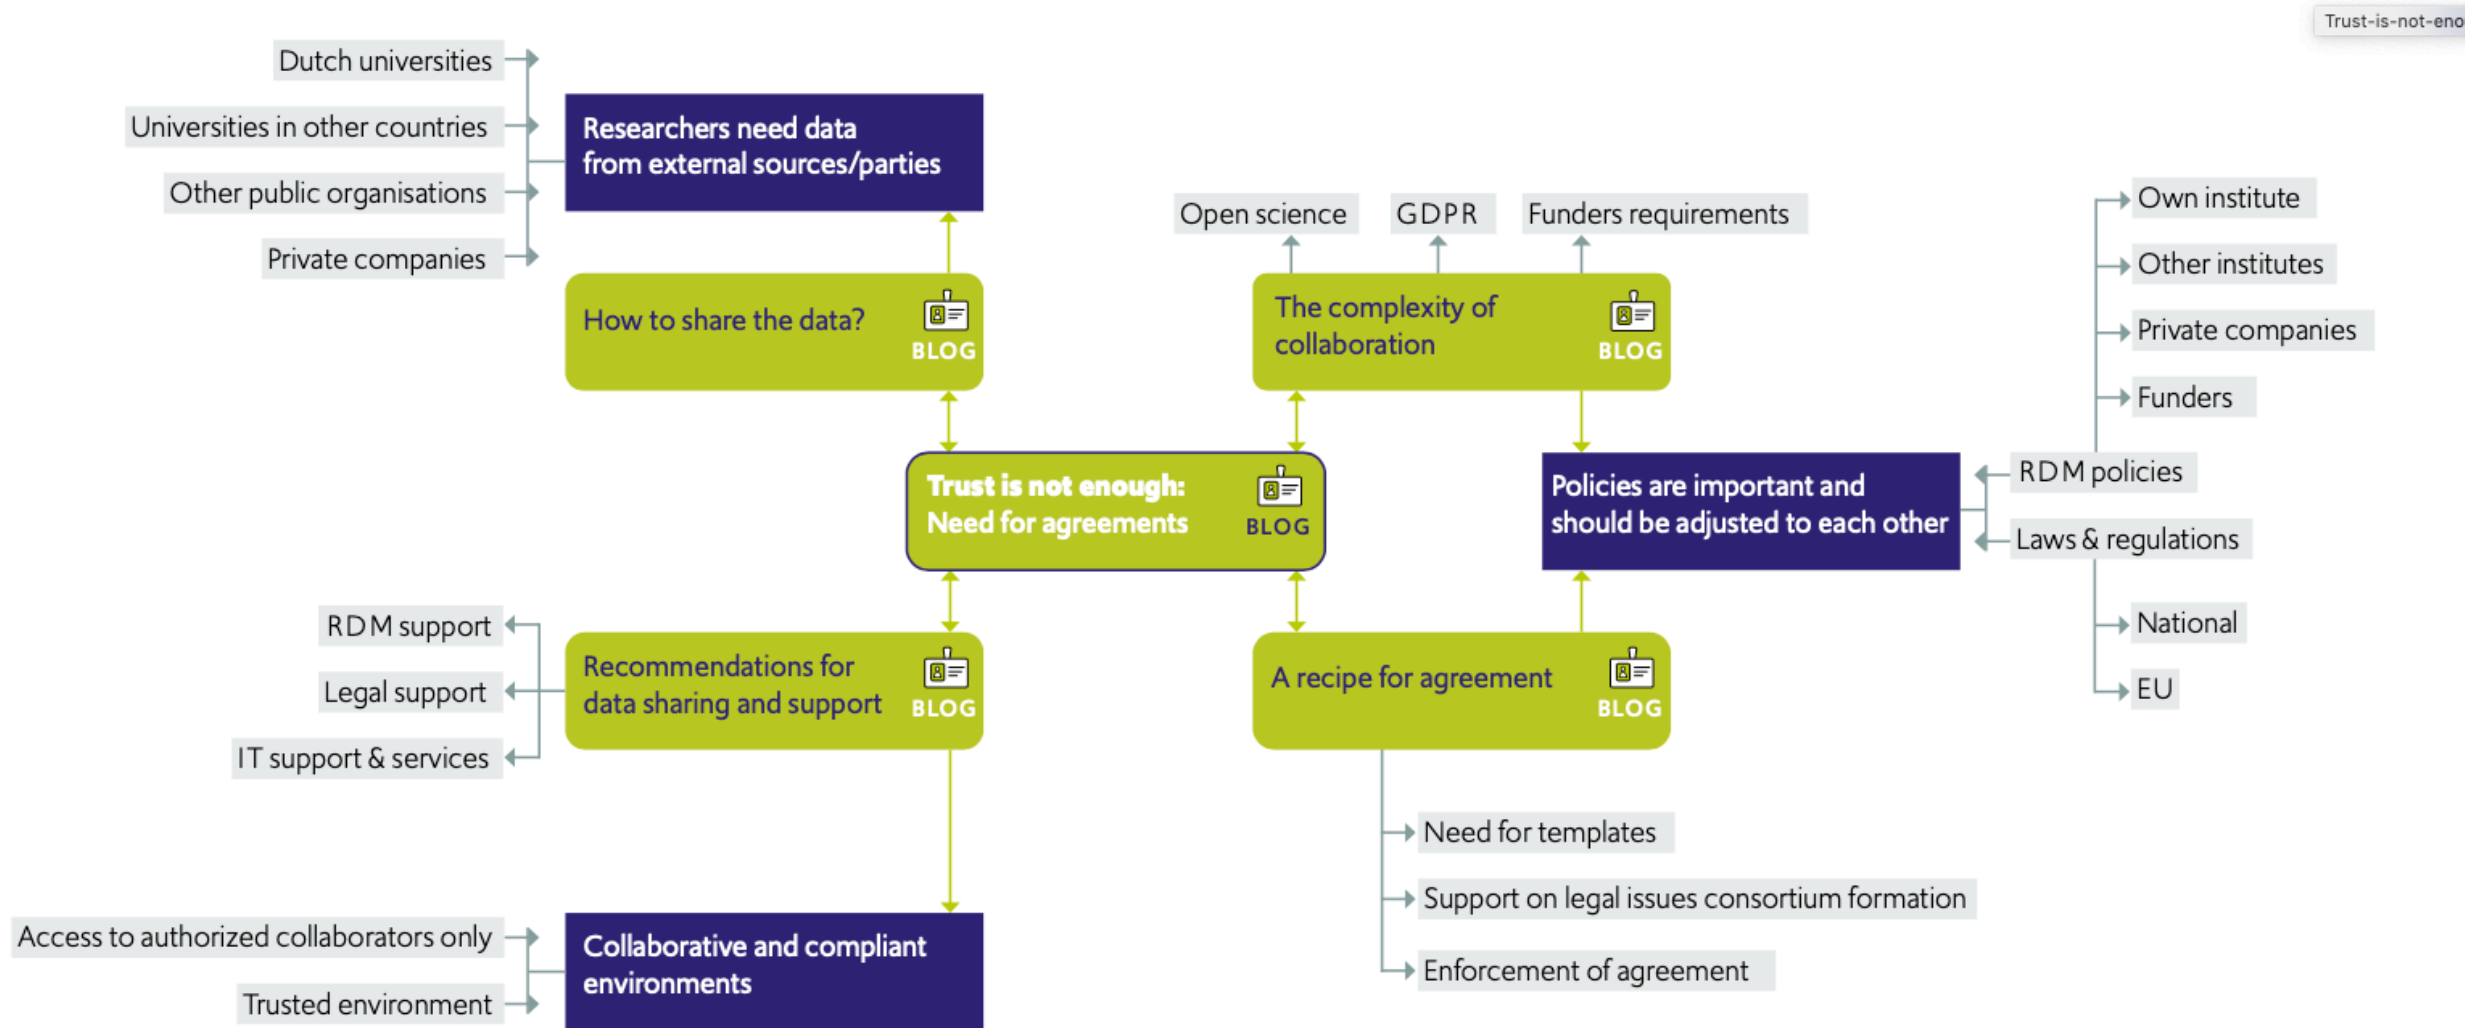

# Services for data sharing in collaboration

- **Support for sharing agreements (legal)**
- **Shared infrastructure**
- **Support for FAIR data sharing from the start of the project**
- **Define a common language**
