

Public consultation on the past, present and future of the European Research & Innovation Framework programmes 2014-2027

Fields marked with * are mandatory.

INTRODUCTION

This consultation aims to collect the views of research institutions, businesses, consumer organisations, as well as non-governmental organisations, public authorities, and other stakeholders on the European Union Framework Programmes (FP) for Research & Innovation, **Horizon 2020** (8th FP) and **Horizon Europe** (9th FP).

The consultation has **five sections**:

- **Section A “About you”** asks information about the respondent’s profile.

- **Section B** focuses on the **past programme Horizon 2020** (2014 – 2020) and aims to collect feedback and evidence to **draw lessons from the past**. This part of the consultation will feed into the ex-post evaluation of Horizon 2020.
- **Section C** focuses on the **current programme Horizon Europe** (2021 – 2027) and aims to take stock of what stakeholders are currently experiencing to possibly **adapt current actions**. This part of the consultation will feed into the mid-term evaluation of Horizon Europe, covering the period 2021 – 2023.
- **Section D** collects views and opinions for the **upcoming Strategic Plan of Horizon Europe (2025 – 2027)**. The questionnaire concerns the future societal challenges that should **shape future EU research and innovation** activities, the strengths and weaknesses of the European R&I system, EU Missions, European Partnerships and synergies with other EU programmes.
- **Section E** asks about the **key lessons learned and messages for the future**. If you wish so, you can **upload a position paper** in this section.

You can choose to **complete only one or more sections** of the consultation.

You can **save your contribution as a draft** on the server and continue later or on a different day.

As the consultation looks at the **past, the present and the future of European Research Framework Programmes**, some topics are addressed under multiple sections.

For example, both section B (Horizon 2020) and section C (Horizon Europe) examine how the programmes contributed (or is contributing) to climate, health, digital and industrial transitions. Likewise, questions on the programme's implementation and administrative procedures are asked in the two sections to account for the simplification measures introduced in Horizon Europe.

- I do not know / No opinion

Why? What else would you need from Horizon Europe?

(i) Balanced cluster calls; (ii) the introduction of Research Actions in the clusters of Pillar II as well as less prescriptive lower TRL collaborative research projects, allowing researchers more scope to define their approach, both to better invest in future knowledge.

Approximately [X] person-days in total for a project duration of [X] months.

Around 20% of the person-days specified above.

How can the administrative burden for applicants and participants be further reduced (regarding application process, reporting requirements, cost calculation etc.)?

Text of 1 to 2000 characters will be accepted

To lower the burden for applicants and participants, what is needed is: (i) impactful, beneficiary-focused simplification of the programme; (ii) acceptance of usual accounting practices; (iii) cross-reliance of audits; (iv) a thorough evaluation of the Horizon 2020 lump sum pilot taking into account institutional (FSign) and coordinators' input; (v) the urgent publication of the Annotated Model Grant Agreement; (vi) focusing the 'gender ex aequo criterion' on gender in research activities; (vii) flagging calls with no SSH relevance (instead of the opposite practice); (viii) for 'FP'10', consider an easier, light-touch approach to programme association, allowing strong-performing R&I countries to join from the start of the programme; (ix) ensure reasonable success rates; (x) increased synergies with other programmes; (xi) an open and transparent project portfolio approach; (xii) avoid call deadlines in January; (xiii) harmonise the IP provisions related to the European Innovation Council within the Model Grant Agreement to align with current best practice and, by doing so, to bring this in line with ERA Action 7 policy developments.

What (would have) happened to your research and innovation project(s), without European-level funding through Horizon Europe?

My project(s) would be:

- Funded by a **public** source at national or regional level, without any major changes in scope, duration or level of ambition
- Funded by a **private** source at national or regional level, without any major changes in scope, duration or level of ambition
- Funded (by either a public or private source), but with a **substantial reduction in scope, duration or level of ambition**
- No funding secured (by either a public or private source), but **would have taken place later**
- No funding secured, and would **not have taken place at all**
- Likely funded, at least to some extent, through other sources but without/ with **reduced cooperation with partners from other countries**
- Likely funded, at least to some extent, through other sources but without/ with reduced **interdisciplinary cooperation**
- Likely funded, at least to some extent, through other sources but with **reduced international visibility** of research and/or research team
- Funded by **another EU programme**, without any major changes in scope, duration or level of ambition
- Another scenario.

If other, please specify.

SECTION E. KEY LESSONS AND MESSAGES FOR THE FUTURE

What are your key lessons from the past and present European Framework Programmes for Research and Innovation and the messages you would like to pass on for the future of the programme?

On the intervention modes and types of action

1500 character(s) maximum

Balanced clusters calls in Pillar II to create more opportunities for industry and universities to collaborate and put in place a research and innovation chain, in order to move beyond a linear understanding of innovation (i. e. based solely on Technology Readiness Levels) towards a more modern understanding based on the interconnections within innovation ecosystems.

On the identification of funding priorities

1500 character(s) maximum

We call upon the EU institutions to safeguard the role of researchers in the Strategic Planning process for Horizon Europe (and its successor programme), assigning a thorough role to researchers in identifying future research topics, while the EU institutions work together with citizens and policymakers.

On the implementation of the programme/projects and procedures

1500 character(s) maximum

(i) Roll out new measures broadly in 'real life', as has been done with the lump sums in Horizon Europe, while the Horizon 2020 lump sum pilot is not finalised - this creates a lot of uncertainties for beneficiaries and is to be avoided; (ii) Provide more examples of a project's pathways to impact, with examples from each cluster; (iii) Make the Model Grant Agreement more interactive and allow users to apply filters; (iv) Allow for more flexibility for large consortia regarding the page limits of proposal templates; (v) Create a more user friendly interface for the Horizon Europe Dashboard; (v) Make available full guidance documents (i.e. the Model Grant Agreement) already at the start of programmes; (vi) Solve recurrent technical issues with the Funding & Tenders Portal and the grant management services.
